Education

University of Virginia - MS Computer Science

Aug 2025 – Dec 2026

Coursework: Cloud Computing, Reinforced Learning, 3D Computer Vision, Security of AI

Charlottesville, VA

Dhirubhai Ambani Institute of Information and Communication Technology

Aug 2019 – May 2023

B.Tech (Hons.), ICT with Minor in Computational Science

Gandhinagar, India

Skills

Languages: Python, Java, Dart, JavaScript, C, C++, SQL, PartiQL, HTML/CSS

Technologies/Frameworks: FastAPI, React, SpringBoot, SpringCloud, Flutter, Tensorflow, Keras, AWS, Git, JUnit, Feign, Reactive Feign, MongoDB, DynamoDB, Firebase, Elasticsearch, Mockito, Kafka, Gradle, Maven, Webflux, Docker

Certification: AWS Certified Solutions Architect – Associate (AWS), Deep Learning Specialization (DeepLearning.AI)

Work Experience

Hexaware Technologies | *Python, React, GenAI, Azure*

July 2025 – Sept 2025

Python Full Stack Engineer - Associate

Richmond, VA

- Engineered an AI agent to automate generation of detailed request forms for hiring candidates using Job Descriptions, Statements of Work, and contextual user inputs, achieving a 20% boost in HR productivity
- Authored the Technical Design Document, defined user stories, and structured application architecture while continuously engaging with end users to refine requirements
- Integrated OpenAI APIs to deliver a context-aware continuous chat feature for data analysis, editing generated forms, and answering user queries
- Implemented a scalable Azure Blob file store structure and APIs to perform CRUD operations on files
- Developed interactive chat and file upload, preview, and download components for the frontend
- Instituted authentication flow to ensure secure, role-based access to Azure Blob storage files

Urban Food Alliance | *Dart, Flutter, Firebase*

Oct 2024 – Jan 2025

Full-Stack Developer

Richmond, VA

- Developed an unemployment assistance mobile app with recruiter outreach, resume curation, and job search optimization features
- Designed and implemented a user profile feature with auto-save triggers for personalized preferences and resume details
- Constructed a job application tracking system with performance metrics, enabling users to manage multiple job entries

Tekion Corp | *Java, SpringBoot, SpringCloud, DynamoDB, MongoDB, Kafka*

Jan 2023 – Sept 2023

Associate Software Engineer

Bengaluru, India

- Engineered a high-performance payment gateway service in SpringBoot, optimized token generation, and leveraged DynamoDB for secure, scalable payment data storage, ensuring seamless transactions
- Built a SpringBoot service integrated with Kafka for Pusher notifications, utilized MongoDB for efficient storage, and monitored system performance with rigorous unit testing
- Implemented a reactive gateway in SpringCloud for non-blocking API calls, introduced ReactiveFeign clients with robust error-handling, achieving a 40% latency reduction
- Devised an HTTP callout service in SpringBoot to integrate external APIs, employing okhttp3 for synchronous requests with retries, timeouts, and fault-tolerance

Projects

Plasma Density Model | *Python, Tensorflow, Keras*

Sept 2022 – Feb 2023

Supervisor: Prof. Bhaskar Chaudhury

Gandhinagar, India

- Developed a UNet-based Deep Learning model to predict plasma density from electromagnetic wave profiles, trained on 8000 images with varied data sparsities.
- Published findings in the esteemed Journal of Physics D: Applied Physics Volume 57
